

ROSHAN ADHIKARI

WEB & MOBILE DEVELOPER

Pokhara-13, Nepal | +977 9766009112 | chhetirosun@gmail.com | github.com/RoshanAdhikari10 | linkedin.com/in/roshan-adhikari-80b883320
Nepali — Native · English — Professional · Hindi — Conversational · Japanese — Basic

PROFILE

BSc IT graduate and web & mobile developer based in Pokhara, Nepal, with three months of onsite internship experience shipping production-facing features in an agile team. I build responsive interfaces with HTML, CSS and JavaScript and cross-platform Android apps with React Native, Firebase and Java, with attention to performance on mid-range Android hardware, not just a development machine. Looking for a web, mobile or software developer role where I can contribute from day one.

EXPERIENCE

Mobile Developer Intern [Tonic Byte (P) Ltd.]

Jan 2025 – Mar 2025

Onsite internship — Pokhara, Nepal

- Shipped a quiz application end-to-end — animated screen transitions, countdown-timer logic, scoring, a leaderboard and sound feedback.
- Built an AI assistant app covering task management, a news feed and adaptive UI interactions, turning designs into shipped, production-ready screens.
- Refactored navigation and extracted reusable components, removing duplicated screen code across the app and cutting related code volume by roughly.
- Worked day to day with React Native CLI and Tailwind CSS, collaborating in an agile team against sprint deadlines.

SELECTED PROJECTS

Quiz App

React Native · Tailwind CSS

Mobile quiz app with a countdown timer, per-question scoring, leaderboard, animated transitions and sound effects. Tuned to hold a steady frame rate on mid-range Android devices. github.com/RoshanAdhikari10/Quiz-App

FoodSathi

HTML5 · CSS3 · JavaScript

Responsive food-ordering front end built without a framework. Dark/light theming via CSS custom properties, scroll-triggered reveals with IntersectionObserver, and semantic markup for search visibility. roshanadhikari10.github.io/FoodSathi

Ping Pong Game

HTML Canvas · JavaScript

Classic Pong rebuilt from scratch with a custom requestAnimationFrame game loop, first-principles collision detection, adjustable difficulty levels and an AI-controlled paddle. roshanadhikari10.github.io/Ping-pong-game

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS, responsive layout, accessible markup

Mobile: React Native CLI, React Navigation, Firebase Auth & Firestore, Android build & release basics

Languages & Data: Java, Python, C#, MySQL, REST APIs, JSON

Tools: Git & GitHub, GitHub Pages, VS Code, Android Studio, Figma, Linux

EDUCATION

BSc. Information Technology — [APU --- Infomax College of IT and Management]

2021 – 2025

Pokhara, Nepal

WHAT I BRING

- Cross-platform delivery — ships web and Android features without rewriting the work twice.
- Readable code — modular components a teammate can pick up months later.
- Device-aware UI — tested on real mid-range phones, not only an emulator.
- Fast learner — picked up React Native, Tailwind CSS and Firebase in three months.
